

Phylogenomics of the Intracellular Parasite *Mikrocytos mackini* Reveals Evidence for a Mitosome in Rhizaria

Fabien Burki, Nicolas Corradi, Roberto Sierra, Jan Pawlowski, Gary R. Meyer, Cathryn L. Abbott, and Patrick J. Keeling*

(Current Biology 23, 1541–1547; August 19, 2013)

As a result of an author oversight, in the version of this article originally published online, there was a coloration error in Figure 2: the box around FdxR should have been orange, indicating that FdxR was identified in the transcriptome survey, rather than gray. This error has now been corrected in both the print and online versions of the article. The authors apologize for the error and any confusion that may have resulted.
